STELLA CHEMIFA CORPORATION									
 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 									
2. This REPORT consists of a total of	4 sheets, includ	ing this cover sheet.							
3. This report is also accompanied by A	NNEXES, comprising:								
a. (sent to the applicant and	to the International Bureau) a total of 5	sheets, as follows:							
sheets of the descrip	tion, claims and/or drawings which have beer	amended and are the basis for this report and/or							
sheets containing red Instructions).	sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative								
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental									
Box.									
b (sent to the International.	Bureau only) a total of (indicate type and num	ber of electronic carrier(s))							
		, containing a sequence listing and/or tables							
related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).									
4. This report contains indications relati	ng to the following items:								
Box No. I Basis of the	report								
. Box No. II Priority									
Box No. III Non-establi	shment of opinion with regard to novelty, invo	entive step and industrial applicability							
Box No. IV Lack of uni	ty of invention

Claims 1 to 9, 12 and 13

The invention set forth in claims 1 to 9, 12 and 13 is novel and involves an inventive step in relation to documents 1 and 2 cited in the international search report and documents 3 and 4 cited in this international preliminary report.

None of the aforementioned documents indicates that melting conditions are determined by analyzing impurities and color centers before growing crystals, and this feature offers the advantageous effect of enabling

verification analysis that high purity has been achieved	
before growing the final single crystal.	
(2) Industrial applicability	
The invention set forth in claims 1 to 9, 12 and 13	
is clearly industrially applicable.
